KTCB to host Wildscaping class April 28

THE COLONY, Texas — Keep The Colony Beautiful presents “Wildscaping 101,” taught by Texas Master Naturalist and The Colony resident Donna Cole, at 6:30 p.m. Thursday, April 28 at City Hall, 6800 Main St.

Wildscaping is landscaping for wildlife, but it benefits everyone. Learn how to attract the wildlife you want to your yard, whether it’s birds, mammals, insects or amphibians, using easy-to-grow native plants. Class will discuss designing and planning the wildscape, plants and local sources, resources and examples.

You don’t have to have a yard, either – wildscapes can be grown in containers on patios and balconies. You can also learn how to get your wildscape certified by the Texas Parks & Wildlife Department and the National Wildlife Federation.

For information, please contact Community Image Manager Iris Browder at 972-624-3151 or email ibrowder@thecolonytx.gov.
