Water Distribution: 972-624-4418

Drainage work scheduled at Stewart Peninsula GC

THE COLONY, Texas — The Colony Public Services crews are scheduled to perform drainage work at the Stewart Peninsula Golf Course on Monday, Aug. 7 (weather permitting). It will continue approximately four days. The work being done will be at the pond pictured below.

The nature of the work is to improve drainage flow to the surrounding streets. The water level in the pond will be lowered in order for Public Services crews to inspect drainage lines for the purpose of identifying any potential impediment to the efficiency of the city's storm-water drainage system.

For more information, call Water Distribution Supervisor Joseph Chase at 972-624-4418 or the after-hours line at 972-624-4433.
